COMMITTEE ON SAFETY OF MEDICINES

EDITED AND SELECTED EXTRACTS FROM THE REGISTER OF ADVERSE REACTIONS

VOLUME III

Volumes I and II of the edited and selected extracts from the Committee's Register of Adverse Reactions contained lists of reactions reported for each drug between January 1964 and October 1971. This new Volume III includes reports received up to June 1973, and the lists have been prepared in a different way. Volume III contains lists of drugs that have been associated with each type of reaction, and it may be described as a "drug-within-reaction-tabulation" in contrast to Volumes I and II which comprise "reaction-within-drug-tabulation".

Notes for Guidance in Interpretation

- The inclusion of events reported to the Committee on its Register of Adverse Reactions does not necessarily mean that they are causally related to the drug named in the lists.
- 2. The Committee is aware that only a small proportion of adwerse reactions are reported and that certain reactions are selectively reported.
- 3. In this volume the drugs reported to be associated with each adverse reaction are listed in a similar order according to a systematic drug code. Drugs with similar therapeutic uses will generally be found in close proximity in the lists.
- 4. Only the principal reaction is included. Thus, for example, if the patient complained of nausea and parathaesiae and then passed into coma, the report would appear once only under the term "coma".
- 5. Some reports received by the Committee mention drugs other than the one suspected to have caused the reaction. If it is considered that these might be even remotely related to the reaction, they are retained in the appropriate lists. For example, aplastic anaemia would not be attributed to Vitamin C if a drug which is well-known to produce this reaction had been administered. Although such association between the Vitamin and the anaemia seems unlikely to be causal it would, nevertheless, be stored on the computer and, should subsequent experience suggest that it might after all be due to the Vitamin, it could be included in subsequent extracts of the Register.
- 6. Sometimes a single case-report will be represented in more than one list, when a patient has developed an adverse reaction while receiving more than one drug. For example, depression has been reported in itients taking both hydrochlorothiazide and reserpine. In such circumstances both drugs would be listed, though the depression is more likely to have been caused by

the reserpine. In other cases it may be less certain which component of a mixture of drugs was responsible for the reaction. Examples are reactions to triple vaccine (DTP), 'Septrin' or 'Bactrim' (sulphamethoxazole and trimethoprim), 'Mandrax' (diphenhydramine and methaqualone) or mixture of isoniazid with PAS or other anti-tuberculous drugs. Here again, a single reported reaction will be entered once against each component of the patient's current treatment.

- 7. To simplify the lists, when the total number of drugs suspected to have caused an individual reaction is less than ten and no reaction was fatal, the reports have been excluded from the detailed lists and the drugs are merely listed in the table headed "Exclusions" which will be found on pages 1-4.
- 8. Estimates of prescriptions in hospitals are not available, nor is it possible to obtain estimates for prescriptions issued in private practice or for sales of drugs "over-the-counter" without prescription. The figures shown against most of the drugs listed are derived from estimates of general practitioners' prescriptions on EClOs issued in England, Wales and Scotland in 1970. They may be used only as a rough guide to the reported incidence of reactions, bearing in mind that the reports have accumulated from early in 1964 to June 1973 inclusive.
- 9. The symbol 'X' indicates that the drug was not indexed in Volumes I and II, either because it was not marketed at the time they were prepared or because no reports of reactions associated with it had been received. The symbol '-' indicates that no valid prescription estimates are available for 1970.
- Numerical comparisons between reactions to various drugs with similar therapeutic uses are not generally reliable because the proportion of reports received from manufacturers and other sources varies widely. For certain drugs, the number may be large simply because the manufacturer has been especially diligent in reporting to the Committee. In the Committee's view, the nature of the reactions rather than their number is often the best indication of the drug's safety in relation to other drugs with similar therapeutic use.
- The former is a 5-digit code in which drugs are arranged in therapeutic groups. For example, the steroid hormones will be found within the range of drug numbers 50000-59999. The adverse reactions have a 4-digit code in which reactions are grouped according to the system or organ affected. For example, skin reactions will be found in the range of codes 1400-1499.

TABLE OF EXCLUSIONS (sheet 1)

i.e. Reactions where there are: 5 drugs or less 2 reports or less per drug no deaths.

Reaction	Reaction name	Drugs OR Classes of Drugs
Number		
0100	Thyroid disorders	Oral contraceptive steroids (OCS)
0104	Thyroid Neoplasm	ocs (cos)
0105	Thyroid Function Studies	0CS
0108	Thyroiditis	Chlordiazepoxide
0128	Haemorrhage of ovaries	Clomiphene
0141	Androgenic effect	OCS and Androgens
0143	Infertility (male)	Allopurinol
0144	Dyspareunia	Methyldopa
0157	Antidiuresis	Chlorpropamide & Phenformin
0205	Cachexia	Methyprylone
0213	Coproporphyrinuria	ocs
0232	Alkalosis	Sodium Bicarbonate
0233	Ketosis	Trifluoperazine & Metformin
0236	Thirst	Ibuprofen & Vitamins
0242	Hyponatremia	Oral hypoglycaemics
0256	Rickets	Anticonvulsants
0291	Avitaminosis	Antibacterial compounds
0296	Hyperlipaemia	OCS & Rifampicin
0384	Haematoma	Warfarin
0391	Methaemoglobinaemia	Phenacetin, Paracetamol,
		Prilocaine & Dapsone
0396	Polycythaemia	Trifluoperazine
0412	Euphoria	Pentozacine
0430	Neurosis	Glutethimide, Glyc.Trinitrate, Methoserpidine & Benzthiazide
0431	Anxiety state	Paracetamol, Indomethacin & Orphenadrine
0460	Intellectual Impairment	Fenfluramine, Codeine, Promethazine, Cotrimoxazole
0462	Judgement Impairment	Griseofulvin
0471	Behaviour change	Indomethacin
0472	Hysteria	Fenfluramine
0509	Neuralgia	Doxepin, Fenfluramine, OCS
0526	Involuntary spasm of	Clofibrate &
	facial muscles	Cyclopenthiazide
0533	Infantile spasm	Pertussis, Diphtheria & Tetanus vaccines
0 584	Localised involuntary	Fenfluramine,
	muscle spasm	0CS
0586	Clonus	Ketamine, Prochlorperazine, Imipramine
0588	Hyperaesthesia	Warfarin, OCS, Prednisolone, Dequalinium chloride
0 596	E.E.G. Abnormality	Nalidixic acid; Polio, Pertussis, Diphtheria & Tetanus vaccines
0599	Pain	0xytetracycline
0603	Retinal Pigmentation	Thioridazine, Ibuprofen
0605	Lacrimate	Indomethacin, Prednisone,
		Potassium salts, Frusemide
0608	Iritis	OCS

Reaction Number	Reaction name	Drugs OR Classes of Drugs
0613	Difficulty in using Contact lens	0CS
0614	Scleritis	Indomethacin, OCS
0615	Cornea	OCS
0616	Keratitis	Smallpox vaccine & Dithranol
0617	Corneal ulceration	OCS, Corticosteroids,
0011	oornear areer actor	Cromoglycic acid
0618	Corneal Perforation	Corticosteroids
0619	Corneal Deposits	Phenytoin, Dithranol
0628	Retinal vein thrombosis	Methysergide, OCS
0634	Ptosis	Lignocaine, OCS
0642	Scotoma	Desferrioxamine, streptomycin,
		Ethambutol, Isoniazid
0652	Hyperacusis	Pentazocine
0805	Pulmonary Hypertension	Fenfluramine
0817	Superior Vena Cava	0CS
	Thrombosis	
0836	Haemorrhoids	Diazepam, OCS
0852	Pericarditis	Phenylbutazone, Influenza &
		Smallpox vaccine
1003	Alteration of voice	Metoclopramide
1011	Hyperventilation	Anticonvulsants
1030	Pulmonary fibrosis	Ibuprofen
1110	Cholecystitis	0CS
1150	Ileitis	0CS
1151	Enteritis	Imipramine, Indomethacin, Ampicillin
1190	Increased appetite	Doxepin, Fenfluramine, OCS
1198	Flatulence	Salbutamol, OCS
1199	Dyspepsia	Imipramine, OCS, Cotrimoxazole
1211	Renal Colic	Acetazolamide, Frusemide
1241	Cystitis	Hydrochlorothiazide, Frusemide, Amiloride, Cyclophosphamide
1256	Polydipsia	Protriptyline, Corticotrophin
1257	Nocturia	Prednisolone, Cyclophosphamide
1 30 7	Cervical Uterine Polyps	0CS
1332	Postpartum Haemorrhage	Triclofos, Meprobamate, Quinestrol, Dydrogesterone
1514	Placenta abnormalities	Imipramine
1423	Contact Photodermatitis	Clioquinol
1427	Pemphigoid	Oxyphenbutazone, Acetazolamide, Gentamicin, Nitrofurantoin
1435	Dry skin	L-Dopa
1436	Ichthyosis	Phenobarbitone, Ibuprofen, Phenindione & Betamethasone
1437	Atrophy of skin (not from injection)	Oxprenolol, Guanethidine,
1439	Tumour-like disorder	Propranolol, OCS,
	of the skin	Prednisolone
1445	Hair change (other than colour)	Amitriptyline, OCS
1450	Hyperkeratosis	Chlordiazepoxide, Nortriptyline, & Spironolactone
1467	Lipodystrophy	OCS
1475	Pityriasis	Practolol, Cyproheptadine
1480	He rpes	Thioridazine, Amitriptyline, Ampicillin, Tetracycline, Influenza vaccine
		Influenza vaccine

Reaction		
Number	Reaction name	Drugs OR Classes of Drugs
1488	Seborrhoea	Methyldopa, L-Dopa; Pertussis, Diphtheria & Tetanus vaccines
1700	Teratoma	Methaqualone with Diphenhydramine, Chlordiazepoxide
1713	Talipes	Perphenazine, Trifluoperazine, Chlordiazepoxide, Tranylcypromine, Amitriptyline
1718	Intra-uterine amputations	Mepyramine
1721	Patent Ductus arteriosus	Hydroxyprogesterone
1722	Coarctation of Aorta	Metronidazole, Gamma globulin
1725	Poland Anomaly	Amphetamine
1734	· ·	
	Biliary Atresia	Dicyclomine, Promethazine, Doxylamine
1742	Congenital Abnormality	Meclozine, Clomiphene,
	of the Bladder	Pyridoxine
1750	Congenital Abnormality of Respiratory System	Nitrazepam
1751	Congenital Abnormality of the Tongue	Dydrogesterone
1780	Congenital Enzyme Deficiency	Hydroxyprogesterone
1790	Chromosome Aberration	Trifluoperazine
1810	Hydramnios	Methaqualone, Diazepam, Dibenzepin, Protriptyline, Iprindole
1817	Foetal Distress	Levallorphan, Pethidine, Nitrofurantoin
1823	Neonatal Jaundice	Nalidixic acid
1827	Premature Birth	Rifampicin, Ethambutol, Isoniazid
1860	Multiple Pregnancy	Anticonvulsants, Diazepam
2002	Allergy	Propanidid, Ibuprofen,
2041		Cotrimoxazole, Radioiodine
	Tendinitis	Nalidixic acid
2331	CSF Pressure raised	Nalidixic acid
2346	Increased Libido	Etafedrine, Doxylamine, Bufylline, Frusemide
2353	Hyperreflexia	Paracetamol, Carisoprodol
2355	Hyporeflexia	Fenfluramine
2 502	Pallor	Polio, Pertussis, Diphtheria & Tetanus vaccines
250 7	Rebound	Trimipramine, Isoprenaline, Salbutamol, Choline theophyllinate, Cromoglycic acid
2508	Slow healing	Indomethacin, Oxybuprocaine, Chlorhexidine
2509	Cross infection	Measles vaccine
2511	Sarcoid	OCS, Cromoglycic acid
2512	Fibroid	OCS
2575	Myeloma Plasmacytoma	Caffeine, Acetylsalicylic acid, Phenacetin
2592	Lipoma	OCS .
2771	False Positive Pregnancy	OCS .
2111	Diagnosis Test	

TABLE OF EXCLUSIONS

(Sheet 4)

Reaction Number	Reaction name	Drugs OR Classes of Drugs
2829	Transmission of Live Vaccine from immunised	Measles vaccine
3001	person to another Atrophy following intra-dermal injection	Triamcinalone
3004	Inflammation following intra-dermal injection	BCG, Smallpox vaccine
3005	Swelling following intra- dermal injection	Chlorpromazine, Smallpox vaccine
3016	Necrosis following sub- cutaneous injection	Lignocaine, Triamcinalone, Sodium chloride, Benzyl alcohol
3017	Oedema following sub- cutaneous injection	Tetanus vaccine
3018	Pain following sub- cutaneous injection	Lignocaine, Adrenaline
3026	Necrosis following intra- muscular injection	Iron-dextran complex, Methyl prednisolone
3027	Oedema following intra- muscular injection	Tetracosactrin, Benzylpenicillin, Procaine penicillin, Benethamine penicillin, Tetanus vaccine
3028	Pain following intra- muscular injection	Benzyl penicillin, Frocaine penicillin, Benethamine penicillin, Tetanus vaccine
3044	Inflammation following intra-articular injection	Procaine
30 54	Inflammation following intra-thecal injection	Isophendylate
3065	Swelling following sub- mucosal injection	Lignocaine
3066	Necrosis following sub- mucosal injection	Lignocaine
9998	Accidental administration of drug by wrong route	Phenylbutazone
